Advanced Topics in Software Testing
Laboratory Assignment 01

Assignment 1: Web GUI Automation

Theoretical aspects
Web GUI Automation

Assignment Objectives
Automation testing

Assignments
Web GUI Automation
Selenium
Java

Assignment 1 – as part of the lab activities

Assignment 1 – Test 3 functionalities of the *MagentoApp* Application Sample

- Problem Statement – test 3 functionalities of the *MagentoApp* Application Sample
  - Interact with various web elements: text area, button, checkbox, radio button, dropdown list, etc.
  - Tasks: search a product item, get the n-th element from the results of a search, find all the products (via scroll down operations), etc.
- Selenium Web driver
- Page Object Pattern
- Data driven tests
- Behaviour driven development (BDD)
- Work in teams of 2-3 members.

Remark: How to configure to use the *MagentoApp* Application Sample?
Please read and perform the steps in the ***2025_2026_ConfigMagentoAppSample.pdf.***

Turn in for Assignment 1:

(a) Problem statement (functionality chosen).
(b) Test cases – files (Selenium -based search elements, steps, assertions, etc).
(c) Reports of the test cases
(d) An archive with all the above files must be submitted in Teams, under the Assignment 1 (the name of the archive: Name1Name2Name3_UI_1.zip)

Assignment and Delivery date for Assignment 1a:

1. Assignment date: laboratory 1 (laboratory 2)
2. Delivery date (first): laboratory 3 (maximal grade 300XP)
3. Delivery date (last): laboratory 7 (maximal grade 150) if time available.

Remark: The solutions must be presented in class (during lab hours).
